Dear Parents,

I have been coaching youth soccer players and coaches in New England for 38 years, even when I was the Place Kicker for the New England Patriots. I have a passion and love for the game.

Winning and losing is part of the game and part of life, but it is not the main focus of coaching the skills and tactics of the game. Soccer is an educational tool for child development on and off the field. I am committed to the total maturity of your child into a strong, well rounded, focused and polite individual. My staff and I care about each player who joins us for this incredible journey through life, where your family and our club family work together for the ultimate development of your child.

I am a proud father of four children who played soccer from elementary school to All American College level. The soccer life skills have held them all in good stead and helped them be a better Doctor, Lawyer, Software Engineer and a NSCAA Premier Soccer Coach. My daughter Felicity Day, the All American and one of the few NSCAA Premier coaches will be the Coaching Director and help with the teams as will I.

We are looking forward to this new club development in our 38 year soccer tradition in New England. Please join us with your child.

Sincerely,

John M. Smith
