Mission Statement

"It is our duty and obligation to present the greatest game in the world to your child. Our presentation will deal with all the basic fundamentals of the game. Your child will be instructed the right way at an early age so they will not develop habits that are hard to break as they get older. We believe baseball's strongest foundation is developed before kids become teenagers. Just as the word fundamental sounds and means, your child will have more fun playing this game than they have ever had before because of the continued success they will have."

-Jay Fennell
